

System Requirements

The user is able to securely log into his/her account with the credentials (username and password) he/she set with the account.

A login form with a light blue background. At the top is a white circular icon of a person. Below it are two input fields: 'Username' with the text 'user123' and 'Password' with masked characters '.....'. At the bottom are two buttons: 'Log In' in blue and 'Forgot Password' in light blue.

If a user forgets his/her password, he/she can click on the 'Forgot Password' button to reset it.

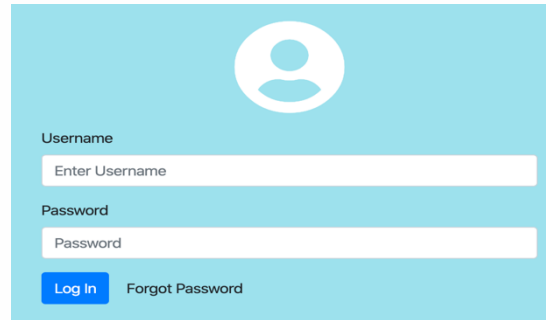

The graphs and charts displayed to the user as visual aid should be engaging and informative.

Users should be able to see their rankings and ratings in relation to other users or track their own progress over time.

Features

1

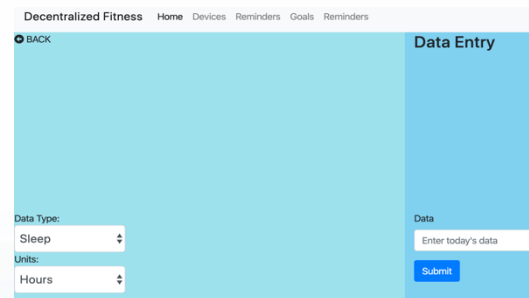

Login Page: Users will be able to log into their account on this platform.

A login form with a light blue background. At the top is a white circular icon of a person. Below it are two input fields: 'Username' with the text 'Enter Username' and 'Password' with the text 'Password'. At the bottom are two buttons: 'Log In' in blue and 'Forgot Password' in light blue.

2

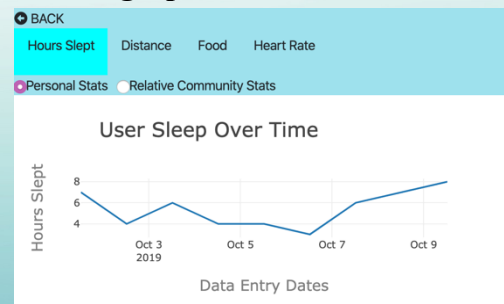

Data Entry Page: Page for users to input and upload their data to this application.

A data entry form with a light blue background. At the top is a navigation bar with links: 'Decentralized Fitness', 'Home', 'Devices', 'Reminders', 'Goals', 'Reminders'. Below the navigation bar is a 'Data Entry' section with two dropdown menus: 'Data Type:' (Sleep) and 'Units:' (Hours). To the right is a 'Data' section with an input field 'Enter today's data' and a 'Submit' button.

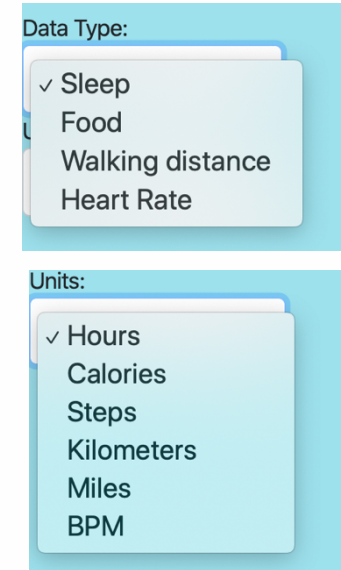

3

Eye-catching visualizations: Users can see their data in a presentable manner, with graphs and charts.

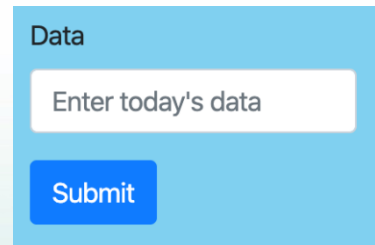

System Requirements

User must be able to input their daily health metrics for analysis.

A selection interface for data type and units. The 'Data Type:' section has a list with 'Sleep' checked, followed by 'Food', 'Walking distance', and 'Heart Rate'. The 'Units:' section has a list with 'Hours' checked, followed by 'Calories', 'Steps', 'Kilometers', 'Miles', and 'BPM'.

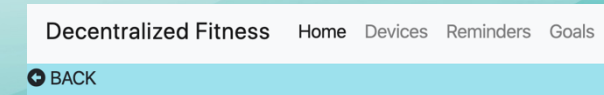

The platform must provide a friendly user interface.

A data entry form with a light blue background. It has a 'Data' section with an input field 'Enter today's data' and a 'Submit' button.

Invalid data must be rejected by the system.

There should be a menu that includes links to all parts of the app.

A navigation bar with a light blue background. It contains links: 'Decentralized Fitness', 'Home', 'Devices', 'Reminders', 'Goals'. Below the links is a 'BACK' button.
